

STUDIO WEIGHT

TECHNICAL DATA SHEET

June 2018

Ensures perfect tensioning of scenic cloths, projection surfaces and green & blue key cycloramas for television, fillm and photography studios.

» ARTICLE CODE	» WIDTH	» LENGTH	» HEIGHT
7482 0000 1007	10 cm	1 m	5 cm
7482 0000 2007	10 cm	1 m	5 cm
7482 0001 1007	10 cm	1 m	5 cm

» WEIGHT	» REMARKS
5.6 kg	Straight L-profile
11.2 kg	Straight L-profile
11.2 kg	Bendable L-profile

» MATERIAL DESCRIPTION

Any kind of set up is possible due to the bendable profiles. They are easy to install and to connect together. Attach the curtain to the profiles using spanfix and install stageweights on the profiles to secure the studioweight.

» APPLICATION INSTRUCTIONS

Use 1 bendable profile to realize an angle of 90 ° with a radius of 100 cm. Fold each section of the profile until mark 1 (12,86%). $7 \times 12,86^\circ = 90^\circ$

Use 2 bendable profiles to realize an angle of 90 ° with a radius of 200 cm. Fold 5 section of each profile until mark 2 (9%). The 2 outer sections of each profile remain straight (0°). $2 \times (5 \times 9^\circ) + 2 \times (2 \times 0^\circ) = 90^\circ$
