

RAIL H100

TECHNICAL DATA SHEET

June 2020

Rail H100 is a multifunctional, budget-friendly curtain track for medium-heavy to heavy curtains.

» TRACK DIMENSIONS (MM)

Track weight	1.34 kg/m
Track section max length	6 m
Curved track min radius	0.2 m

» SPECIFICATIONS

- The H100 is a steel track, standard available in three different finishes galvanized, with a white (RAL 9016) or black coating (RAL 9005). Custom colours are available on demand.
- Rails are available in straight lengths or curved to your specific tions. Couplers are available to join straight as well as curved rails.
- Mounting options include a wide range of different fi tures, offering a huge variety of application areas.
- A H100 system can be operated:
Manually: walking along the track or by pull-cord operation
Automatically: by pull-cord operation with our RTD series motors
- Different types of runners are available to answer a broad range of possible needs, including ball raced runners, scenery carriers, master carriers with brakes and overlap carriers.

» LOAD CAPACITY TRACK

L (m)	Point load (kg)
1	73 kg
1.5	61 kg

L (m)	Uniformly distributed load (kg/m) • total resulting load (kg)
1	150 kg/m • 150 kg
1.5	75 kg/m • 112 kg

! The distance between two supports should not exceed 1.5 m

The stated load capacities apply to the rail only. The load bearing capacity of the carrying construction (ceiling/truss/...) and all individual mounting accessories must be taken into account as well.

Load capacities have been calculated using Safety Factor 2. Apply the required Safety factor according to the standards pertaining to your application.

WALK-ALONG OPERATION

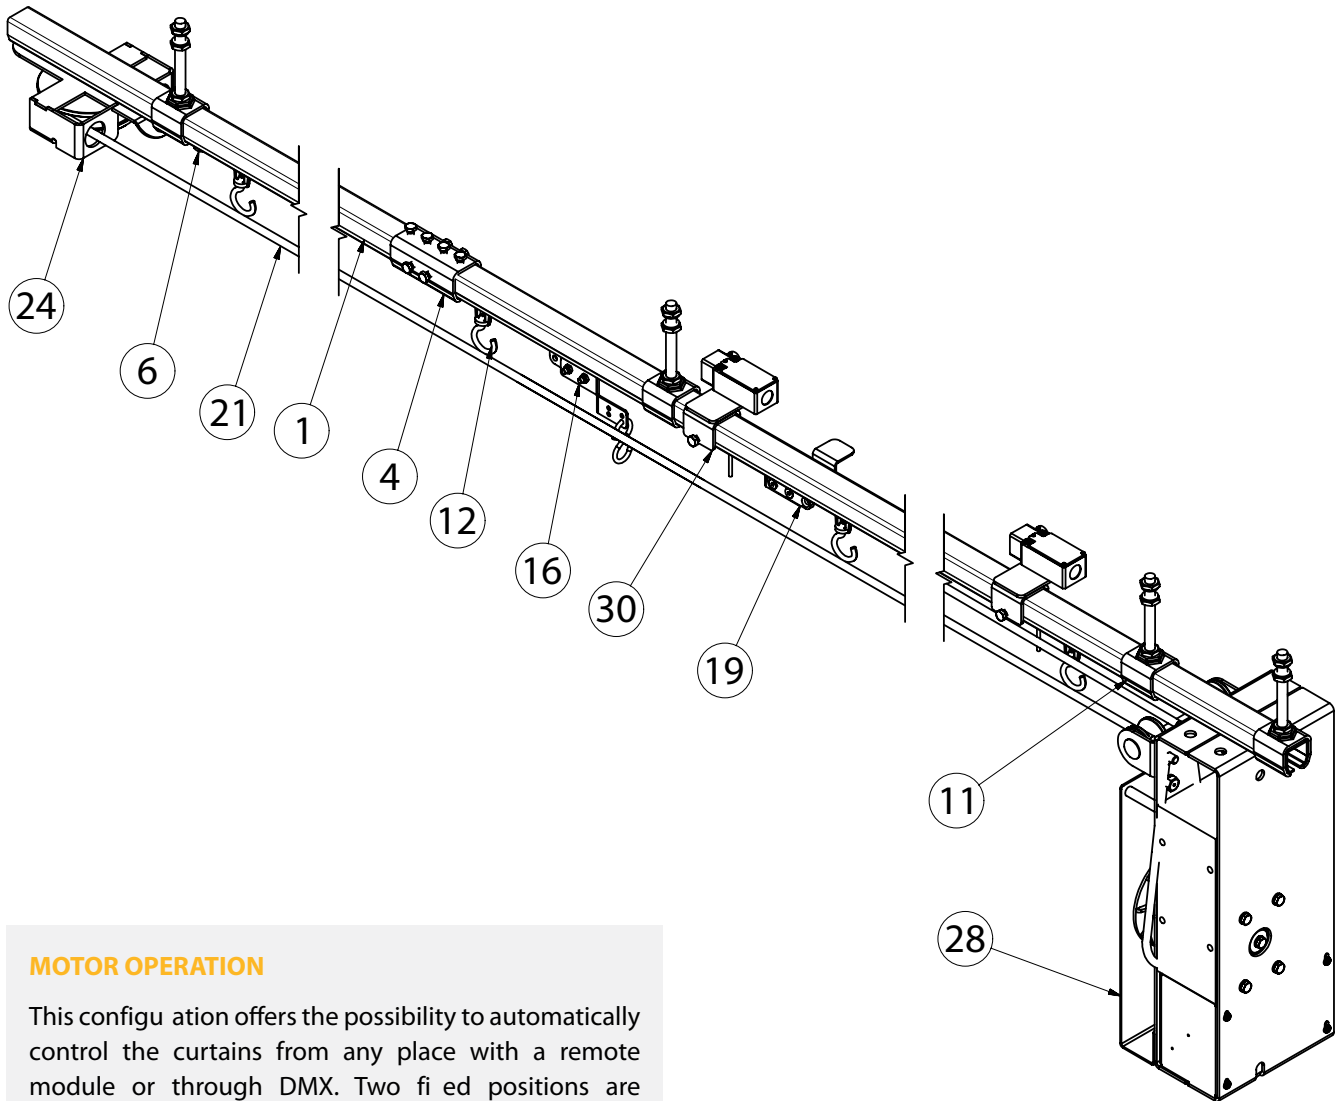

This is the most basic installation of the H100 system. The curtain is pulled along the rail to its required position. Optional braked master carriers make positioning more accurate.

MANUAL ROPE OPERATION

This mode offers operation from one fixed place with the possibility to position the curtains at any distance. Different overlap carriers ensure perfect closure of curtains of any size. For larger curtains, double rails can be placed with a custom overlap, while operation from one place and with one rope remains possible.

! Rope operation is only available for straight tracks!

MOTOR OPERATION

This configuration offers the possibility to automatically control the curtains from any place with a remote module or through DMX. Two fixed positions are possible and, depending on the motor, variable speed control is also provided. Different overlap carriers ensure perfect closure of curtains of any size. For larger curtains, double rails can be placed with a custom overlap, while operation with one motor remains possible.

! Motor operation is only available for straight tracks!
