

TRUSS ROLLER

TECHNICAL DATA SHEET

September 2017

Easily configure the roll-up system according to your needs, by combining Truss Rollers with the HiSpeed motor unit that suits best. Choose the width of the set-up by combining several standard size trusses. When joined together, the built-in axes are connected and aligned perfectly, so one motor can drive several rollers at a time.

NAME	ART.NR.	COLOUR	WEIGHT	INFORMATION
Truss Roller (40/40 truss)	8140 3115 3007	Black	125 kg/piece	Length: 3 m • Diameter: 20 cm
