

SCREEN FRAME

TECHNICAL DATA SHEET

October 2017

Large front or rear projection screen, on a black modular, aluminium frame for wall mounting.

- The projection screen surface is stretched on an aluminum frame by using strong spanners.
- It offers a permanent fixed or fly screen.
- The framework is invisible when the fabric is in place.
- Screen Frame is ideal for large projection surfaces & can be adapted to suit all venues: movie theatres, larger conference rooms, communication rooms or auditoriums.
- The Screen Frame profile can be bend in-house for projection screens with particular forms and dimensions.
- Our screens are made-to-measure.
- Optionally, the screen can have a fix or moving masking.
